

Easy Directions - Defense

Place 3 coin chips anywhere on the game field strategically preventing the offense from landing on any Receiver's Hands as they try to obtain first downs and touchdowns. **No defensive chips may have contact with any receiver hands as they are placed on the table.*

BLITZING

A Blitz can be used 1 time every 4 downs by adding two more chips to the defense. *(Totaling 5 chips)*

INTERCEPTION

An interception occurs when a Passed Offensive Chip makes contact with any defensive chip that was placed on the playing field and that defensive chip has landed on any of the receiver hands.

INTERCEPTION FOR TOUCHDOWN "PICK 6"

1 of your chips is marked "Pick 6" and you may use this chip every time on defense as one of your three chips that are placed on defense.

Hint - Do Not let the Offense see where you place this "Pick 6 Chip".

(Reason- If an interception were to occur and it happens to be a "Pick 6 Chip" then 6 points for the defense.)
