

## *Easy Directions - Offense*

### **COMPLETE A PASS**

To complete a pass on offense simply throw your coin chip downfield in the air while trying to land on any receiver decals. The chip that is thrown must come to a complete stop on any of the receiver hands. If any part of the Receiver's Hands are making contact with the Thrown Chip than the result is a pass completion for the offense at the spot of the catch. *\*Always use the front of the chip to mark your spot.*

### **RUNNING THE BALL**

The offense may elect to run the ball by announcing out loud to the defense. The offensive player rolls 1 die and a defensive player rolls the other. The highest roll from each will gain the difference for the yardage. *(ex. Offense may roll 8 and Defense rolls 5, then the yardage would be +3 yards gained for the offense).* Rolling doubles by each player will result in a turnover for the defense and they would take over on offense at the same spot.

### **FIRST DOWN**

The orange circles that are located on each sideline indicate the first downs. They are spaced out every 10 yards. The front of the chip needs to be equal to or passed the orange circle for a first down.

### **EXTRA POINT KICK**

Extra Points are to be attempted from the 10 yardline by holding the mini football in place on the game field with one finger, then using the other hand to flick the mini football through the goal post uprights for 1 extra point.

### **FIELD GOAL KICK**

Field Goals may be attempted by holding the mini football in place on the game field with one finger, then using the other hand to flick the mini football through the goal post uprights for 3 points!

### **PUNTING**

Throw your coin chip downfield in the air. Offense takes over where the coin chip stops on the game field or at the point of going out of bounds. *(Landing your chip in the endzone or touching the goal line would result in a touchback, offense would take over at their own 20 yardline).*

### **TOUCHDOWN**

Completed pass in the end zone to any receiver decals. If a coin chip lands on a receiver decal that is not in the end zone but front of chip touches goal line, TD is called. Running the Ball - A roll of the dice by both teams that results in positive yardage for the offense going into end zone, TD is called.
